

## **Appendix-5**

### **Innovative Teaching Methods Usage Score Application Form**

**(Amended: Senate Decision – 24/04/2024 – 2024/05)**

#### **Academic Year:**

Innovative Teaching Methods in Education refer to a comprehensive set of pedagogical approaches, technological tools, and practices that go beyond traditional methods in order to enhance teaching processes and improve the student learning experience. These methods aim to increase students' ability to access and apply knowledge by making the learning process more interactive, student-centered, personalized, and flexible. Innovative methods also contribute to the development of 21st century skills such as critical thinking, problem-solving, creativity, and collaboration.

#### **Examples:**

- **Flipped Classroom:** Students study course materials in advance at home and use class time for group work, discussions, and practical activities. This method promotes deeper learning and better understanding of course content.
- **Gamification:** Course content is delivered through gamified tasks, scoring systems, and competitive activities in order to increase student motivation and engagement.
- **Project-Based Learning:** Students learn by working on projects aimed at solving real-world problems. This method enhances students' problem-solving skills and applied knowledge.
- **Blended Learning:** The combined use of online and face-to-face learning methods provides students with a flexible learning experience.
- **Adaptive Learning:** A personalized learning experience is offered through materials tailored to students' individual learning pace and style.
- **Use of Digital Tools (e.g., Quizlet):** Digital tools such as Quizlet are used to reinforce course content and enable students to learn at their own pace. Such tools provide interactive learning materials and help students grasp concepts more quickly.

**Full Name:**

**Course Title:**

**Course Code:**

**How many years have you been teaching this course?:**

**Number of Students:**

**Please attach the course syllabus.**

**I. Please describe the Innovative Methods and Techniques you have used.**

**II. Please specify any special tools and facilities (special classrooms, laboratories, workshops, etc.) used while implementing these methods and techniques.**

**III. How frequently did you use these methods and techniques throughout the semester?**

Once

Once a month

Once every two weeks

Throughout the semester

**IV. What indicators demonstrate that the methods and techniques you used are innovative?**

**V. What was the impact of using these methods and techniques on students' learning experience?**

**NOTE:** This form shall be completed only for courses that include processes beyond standard teaching methods and tools. Assessments regarding standard Blackboard usage in courses will be conducted by the Office of Learning and Teaching.
